Bunce, George E. See Kinnamon, Kenneth E., 225.
Bunn, Clara R. See Matrone, Gennard, 154.
Butter-induced obesity in rats, cardiovascular lesions, blood lipids, coagulation and fibrinolysis, 325.

C

Cadmium, effects on life span, tumors and tissue levels in rats, 51.
Cajanus indicus, of Haiti, proximate analysis, 415.
Calcinosis, magnesium, in dog and rat, effect of fluoride, 23.
Calcium absorption along GI tract of laying fowl as influenced by dietary calcium and egg shell formation, 433.
— and phosphorus metabolism in man, effect of high phosphorus intake, 125.
—, high and low intake, radioactive zinc metabolism in man, 169.
—, phosphorus and magnesium balance in baby pigs, effects of dietary magnesium level, 209.
Calvert, C. C. See Menge, H., 115.
Carbohydrate(s), dietary, and fat, effect of kind and amount on lipid metabolism of puppies, 271.
—, effect of type on energy metabolism and body composition of rats fed low protein diets, 289.
— of leguminous seeds, wheat and potatoes on serum cholesterol concentration in man, 313.
Carbon, radioactive, dioxide, respiratory, rate of excretion after injection of C^{14}-amino acids in rats fed raw soybean meal, 253.

Cartilage formation, abnormal, in young chicks, nutritional, genetic and morphological studies, 236.
Casein and soy protein diets, effect on growth of ducklings, 17.
Catalase, effect of iron deficiency in rats, 383.
Cereal-legume blends, Haitian, nutritional value (rats), 415.
— proteins, adequacy for nitrogen retention in human adults, 350.
Cheese, Cheddar, B-vitamin content, 362.
Chicken(s), absorption of calcium and phosphorus along GI tract of laying fowl as influenced by dietary calcium and egg shell formation, 433.
— and rats, value of selenium in alfalfa for prevention of Se deficiencies, 213.
—, effect of dietary lipids on fatty acid composition of neutral lipids and phosphatides on liver and bile, 143.
— fed deficient-to-excess protein and lysine, and infected with tuberculosis, protein metabolism in livers, 133.
—, free amino acid patterns of blood plasma of chicks fed sesame and soybean meals, 45.
—, free amino acid patterns of blood plasma when fed fishmeal proteins, 37.
—, linoleic acid and reproduction in hens, 115.
—, metabolism of ethylenediaminetetraacetic acid, 187.
—, young, nutritional, genetic and morphological studies of abnormal cartilage formation, 236.
CHIEMCHAISRI, Y., AND PAUL H. PHILLIPS. Certain factors including fluoride which affect magnesium calcinosis in the dog and rat, 23.
Children, amino acid requirements of girls, nitrogen balance method, 333.
—, preadolescent, excretion of niacin or tryptophan metabolites when fed controlled diets supplemented with nicotinamide, 309.
—, preadolescent, riboflavin utilization in relation to nitrogen intake, 82.
Chlorella pyrenoidosa utilization as protein source for humans, 376.
Cholesterol metabolism, influence of medium-chain triglyceride in rats, 67.
—, serum, concentration in man, effect of carbohydrate of wheat, leguminous seeds and potatoes, 313.
Choline deficiency, fatty acid composition of rat liver lipids during, 178.
— -deficient diet, nucleic acid, phosphorus and creatine metabolism in muscle, liver and brain of rabbits fed, 298.
— -deficient rats, effect of dietary lipid and diethylstilbestrol on liver fatty acids of, 399.
CHRISTENSEN, D. A., AND E. W. CRAMPTON. Effects of exercise and diet on nitrogenous constituents in several tissues of adult rats, 369.
Chromium, effects on life span, tumors and tissue levels in rats, 51.
Coagulation, blood, in butter-induced obesity in rats, 325.
COON, EDMUND. See Wiese, Hilda F., 271.
Copper, effect on radioactive zinc tissue distribution and excretion in rats, 225.
— metabolism in germfree and conventional rats, 159.
—, radioactive, absorption from ligated segments of rat GI tract, 120.
Corn-bean diets, Haitian, weight gain and PER of rats fed, 415.
— protein, determination of first limiting nitrogenous factor, for human adults, 350.
CORNATZER, W. E. See Glende, Eric A., Jr., 178.
CRAMPTON, E. W. See Christensen, D. A., 369.
Creatine metabolism in muscle, liver and brain of rabbits fed choline-deficient diet, 298.
CUSACK, RUTH P., AND W. DUANE BROWN. Iron deficiency in rats: changes in body and organ weights, plasma proteins, hemoglobins, myoglobins and catalase, 383.
Cystine biosynthesis in the pancreas and its transport as exocrine protein secretion in the intestinal tract of the rat, effect of soybean trypsin inhibitor and penicillin, 245.
Cytochrome oxidase in mice and rats fed meat diet, 303.
